Mr. Greg DeGrazia, Chair
CCSD #1 Site Steering Committee
16722 SE Bolivar Street
Damascus, OR 97089

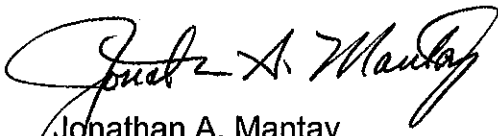

Dear Mr. DeGrazia:

Pursuant to a request by Mr. John Lang, Site Steering Committee Facilitator, the following is provided to clarify the Committee's scope regarding the selection of potential wastewater treatment sites.

The Citizens Advisory Council (CAC) for CCSD #1 recommended to the County Commissioners that a site for a new wastewater treatment plant be located within the current service area of the District. The County Commission, serving as the Board of Directors of CCSD #1, accepted this recommendation and later modified the recommendation at the request of the CAC to include locations outside of the District. This modification was made in order to include the industrial area within the City of Milwaukie or other new sites within the service area.

Hopefully, this letter will clarify any questions you may have regarding the Board's intended focus of the Site Steering Committee. If necessary, I am available to attend a future meeting of the Committee.

Very truly yours,

Jonathan A. Mantay
District Administrator
